Continuation of Substance of Interview including description of the general nature of what was discussed: The key issues the Examiner deems to be necessary for initiating an interview is about the limitation in most of the claims of "receiving signals on two bi-directional communication frequencies simultaneously", in the hope that some kind of Examiner's Amendment can be agreed upon to place the case in condition for allowance. The following issues are discussed. 1. Examiner indicated to Ms Gunderson that the originally claimed feature of "receiving signals on two bi-directional communication frequencies simultaneously" is not described in the original Specification; but otherwise would be allowable if an Examiner's Amendment can be worked out to incorporate the originally claimed feature into the Specification, for which Ms Gunderson indicated the need of more time to consult with the Applicant (therefore, an Office Action with 112 first paragraph rejection will be made on the ground of failing to comply with written description). 2. Examiner also indicated to Ms Gunderson that Claim 35, claiming a "computer-readable medium", will be subject to 101 rejection because Applicant failed to provide in the Specification what it actually is. Ms Gunderson agreed to cancel the claim with an Examiner's Amendment, which Examiner's Amendment however is not possible at this time since a rejection will have to be made in view of point 1 above and Examiner's Amendment cannot be made unless it's for allowance (therefore an Office Action with a 101 rejection for claim 35 will be made). 3. Examiner further indicated to Ms Gunderson that previous rejection on claim 27 will be maintained as is and Claims 31 and 32 will be allowed, as amended, over prior art. 4. Ms Gunderson requested an Office Action be sent and Applicant would take action accordingly upon receiving the Office Action.
